Lance and Stephen,

I have put the reference documents on the Share drive under H: 6SF/SHARE/Wilcox Docs 3-16-2015 Report. You will see each of the seven parties has a folder with subfolders for their Certified and Non-certified documents. There is also a General References folder with Non-certified documents that apply to more than half the parties.

There are some Non-certified documents that cannot be certified, such as webpages, then there are also some Non-certified documents that can be certified. These documents were identified after the initial orders were placed and we did not have time to get them ordered with any certainty of having them in time to be included in the report. We can order those additional documents if you wish and substitute out the Non-certified copy with the Certified copy when we receive it. Please let me know and we can begin to order them on Monday.

Stephen, now that the References are available on the Share drive, do you still wish to have a separate CD?

Best regards,

Kim

Kim,

I have access to the share drive. Do you have access to the Superfund folders? If you have access you can add the documents there. Apparently I don't have permission to create a new folder.
